EDUCATION

IES College of Technology (Bhopal ,India)

Bachelor of Technology in CSE-AIML

CGPA - 7.94

2023-2027

PROJECTS

Guardian AI | *React.js, FastAPI, SQLite, SQLAlchemy, JWT, Ollama, Python*

[GitHub Link](#)

- Engineered a full-stack AI career platform integrating **6 AI-powered modules** including resume analysis, ATS job matching, mock interviews, cover letter generation, personalized career roadmaps, and an intelligent career assistant.
- Designed and implemented **12+ JWT-secured REST APIs** using FastAPI, SQLAlchemy, and SQLite for authentication, report management, chat history, user profiles, and AI workflow orchestration.
- Integrated the Ollama-hosted **Qwen 2.5 LLM** to generate personalized resume feedback, interview coaching, skill-gap analysis, career recommendations, and AI-powered document generation.
- Developed a responsive React.js dashboard with **10+ reusable UI components**, analytics, PDF export, dark mode, and persistent user sessions, delivering a seamless cross-device user experience.

TransitOps | *React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS*

[GitHub Link](#)

- Engineered a full-stack fleet management platform integrating **5 core modules** (Vehicles, Drivers, Trips, Maintenance, and Fuel Expenses) through a centralized dashboard.
- Developed **25+ JWT-secured REST APIs** using Node.js, Express.js, and MongoDB, implementing role-based authentication, CRUD operations, and secure data management.
- Built a responsive React.js dashboard with **15+ reusable UI components**, real-time fleet analytics, trip monitoring, maintenance scheduling, and fuel expense tracking using Tailwind CSS.
- Designed a scalable backend architecture with reusable middleware, protected routes, and optimized MongoDB queries, improving maintainability and enabling seamless feature expansion.

AI Store Intelligence System | *Python, FastAPI, YOLOv8, SQLite, Docker*

[GitHub Link](#)

- Developed an AI-powered retail analytics platform integrating YOLOv8 and ByteTrack to analyze **real-time CCTV streams** for customer detection, tracking, and occupancy monitoring.
- Implemented **12+ REST APIs** with FastAPI and SQLite for event ingestion, visitor analytics, sales metrics, customer funnels, and report generation.
- Dockerized backend services to ensure reproducible deployments, portability, and efficient execution across multiple environments.
- Created a Streamlit analytics dashboard visualizing **6+ KPIs**, including customer traffic, dwell time, conversion rate, heatmaps, and store performance insights.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML/CSS

Frontend/Backend: React.js, Tailwind CSS , Node.js, Express.js, FastAPI, REST APIs, JWT Authentication

Databases: MongoDB, MySQL, SQLite

AI/ML: YOLOv8, Ollama (Qwen 2.5), Scikit-learn, Hugging Face, OpenCV

Libraries: NumPy, Pandas, Matplotlib, SQLAlchemy, Streamlit

Developer Tools: Git, GitHub, Github Actions (CI/CD) , Docker, Postman, VS Code, Jupyter Notebook

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering

CERTIFICATIONS

- Database Management Systems (NPTEL)
- Python for Data Science (NPTEL)
- Summer Analytics 2025 (IIT Guwahati)

ACHIEVEMENTS

- Solved **300+** Data Structures & Algorithms problems across LeetCode and GeeksforGeeks.
- Secured **3rd Runner-Up** among **100+ teams** at the HackNova Hackathon.
- Selected as a **National Finalist** at the Hacksagon National Hackathon.
- Ranked among the **Top 15,000** participants in **Google The Big Code 2026**.
